

# SHARING AND AUTOMATION FOR PRIVACY PRESERVING ATTACK NEUTRALIZATION

## A H2020 project that aims to develop a platform for sharing and automation to enable privacy preserving and efficient response and recovery utilising advanced data analysis and machine learning

### Privacy

Privacy-preserving aggregation and data analytics including advanced clientside abstractions

### Knowledge Sharing

Standardisation of knowledge in the context of incident response and recovery to enable reuse and sharing

### Threat Detection

Federated threat detection based on sharing of anonymized data and sharing of trained machine learning models

### Visual Support

Visual, interactive support for Security Operation Center operators leading to better performance

## SAPPAN Innovations
